## 15-17 May 2024

Organizers: Alexander Free, Carlos Noreña and John Weisweiler

This conference explores the nature of uneven development in the ancient Mediterranean and Near East. Drawing on the theories developed by Amartya Sen in *Development and Freedom* (1999) and Branko Milanovic in *Global Inequality* (2016), we seek to restore a spatial dimension to our understanding of ancient economies and political economies.

This is the second leg of a two-part conference series, organized as part of the LMU-UCB collaboration in the humanities. Papers will be pre-circulated. But participation is open to all.
